← ————— →
- RESPONSIVE -

DIKTISAINTEK
BERDAMPAK

FUNGSI

- Bikin halaman Responsive atau bisa di buka di semua device
- Layout menentukan device, bukan server

DIKTISAINTEK
BERDAMPAK

1. viewport

Viewport meta tag = "jembatan" agar web yang kita buat responsif benar-benar menyesuaikan layar device.

```
<meta  
  name="viewport"  
  content="width=device-width,  
          initial-scale=1.0"
```

>

2. Media Queries

Breakpoints umum :

- Mobile: max-width: 576px
- Tablet: max-width: 768px
- Desktop kecil: max-width: 992px
- Desktop besar: max-width: 1200px

Bootstrap Breakpoints

Specificity ↑

	Phone (Portrait) 	Phone (Landscape) 	Tablet 	Laptop/Desktop 	Large Desktop 
(Extra Large) XL					✓
(Large) LG				✓	
(Medium) MD			✓		
(Small) SM		✓			
(Extra Small) XS	✓				

Screen Width →

DIKTISAINTEK
BERDAMPAK

Cara pake Media Queries

```
// `xs` returns only a ruleset and no media query  
// ... {  
  
}
```

```
// `sm` applies to x-small devices (portrait phones, less than 576px)  
@media (max-width: 575.98px) {  
  
}
```

```
// `md` applies to small devices (landscape phones, less than 768px)  
@media (max-width: 767.98px) {  
  
}
```

DIKTISAINTEK
BERDAMPAK

Cara pake Media Queries

```
// `lg` applies to medium devices (tablets, less than 992px)
@media (max-width: 991.98px) {

}
```

```
// `xl` applies to large devices (desktops, less than 1200px)
@media (max-width: 1199.98px) {

}
```

```
// `xxl` applies to x-large devices (large desktops, less than 1400px)
@media (max-width: 1399.98px) {

}
```

3. Dasar Grid System Bootstrap

Bootstrap menggunakan grid system 12 kolom.

Artinya: dalam 1 baris (.row), kita bisa membagi ruang menjadi 12 bagian.

Contoh:

- `col-12` → Lebar penuh (1 kolom = 12).
- `col-6 + col-6` → Terbagi 2 sama rata.
- `col-4 + col-8` → Terbagi 1/3 dan 2/3.

DIKTISAINTEK
BERDAMPAK

4. row

Digunakan sebagai wadah horizontal.
Harus ada di dalam `.container` atau `.container-fluid`.

Fungsi utama:

- Mengatur kolom agar sejajar secara horizontal.
- Menghapus gutter (margin/padding default) agar grid rapi.

DIKTISAINTEK
BERDAMPAK

5. col (column)

Merupakan bagian isi dari row.

Bisa menggunakan:

- Auto layout → col (dibagi rata otomatis).
- Fixed layout → col-4, col-8, dll.

6. Responsif (Breakpoint)

Bootstrap menyediakan breakpoint:

- col- (extra small, <576px)
- col-sm- (≥ 576 px)
- col-md- (≥ 768 px)
- col-lg- (≥ 992 px)
- col-xl- (≥ 1200 px)
- col-xxl- (≥ 1400 px)

7. Nesting (Kolom dalam kolom)

Kolom bisa dipecah lagi dengan row baru di dalamnya.

```
<div class="row">
  <div class="col-6">
    <div class="row">
      <div class="col-6 bg-danger">A</div>
      <div class="col-6 bg-success">B</div>
    </div>
  </div>
  <div class="col-6 bg-dark text-white">C</div>
</div>
```
